DPQL-1064-F-0015-001N-06-NK-A

Q-Switched 1064 nm Laser

PRODUCT OVERVIEW

The DPQL-1064 is a laser module that integrates a 1064 nm Q-switched laser head, a temperature controller, and a thermal sensor that monitors temperature control in real time. The laser generates a 1064 nm laser pulse at a stable repetition rate without external pulse input.

Features

- High repetition rate
- Internal TEC and thermistor
- High reliability
- Free space output

Applications

- Seed lasers
- Frequency conversion
